DETAILED ACTION

1. This office action is in response to Applicant's amendment filed on 13 November 2007.

Allowable Subject Matter

2. Claims 26-32 and 52-58 are allowed. Claims 26 and 31 are the independent claims.

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is U.S. Patent 4,722,021 to Hornung et al. and U.S. Patent 4,890,306 to Noda, which were applied to the claims in the office action mailed 13 August 2007. Suffice it to say, the patents to Hornung et al. and Noda do not disclose "wherein the first link is an inductive link having complementary inductors which in use of the machine have relative displacement, one of the inductors being mounted to the spindle and the other of the inductors being mounted to the stationary part" as claimed in independent claim 26 or "wherein the at least one electrical contact is in the form of a "C" shaped conductive element mounted to a non-conductive block at the shank receiving area" as claimed in independent claim 31, and as such do not anticipate the instant invention as disclosed in independent claims 26 and 31.

Furthermore, there is no combinable teaching in the prior art of record that would reasonably motivate one having ordinary skill in the art to so modify the teachings of Hornung et al. and Noda, and thus, for at least the foregoing reasoning, the prior art of record does not render obvious the present invention as set forth in independent claims 26 and 31.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
